

GKCF rules, www.gkcfonline.com, will govern the OC-6 Sprint Championship with the following amendments:

Part A. 1.1 [f] Page 3: "...using the same rules that will be used in the upcoming Federation Flag Event..."

Flag events usually follow IVF rules for the start of race canoe alignment and flag starts which differ from GKCF.

Since introduction of IVF rules at this time may cause confusion, GKCF rules with regard to canoe alignment and flag starts will be administered.

Part B. 2.1 [1] Page 6: "...such other division[s] as may be approved..."

This event will include Open Mix and Junior Mix divisions

Part C. 2. [c] OC6 Hull Specs Page 10: "Minimum hull weight of 375 pounds."

All four (4) GKCF galaiides to be used for this event weigh considerably less than 375 pounds.

This event, weights will be attached to all four galaiides equalizing the weight to 325 pounds.

Part C. 5. [g] Page 11: "The weights must be fibreglassed onto the hull or under the seat/s..."

Weights will be duct taped to the middle-top portion of the iako extending over the canoe hull.
